## **JOHN EVERITT**

Mechatronics 20  
W.H.Croxford,  
Airdrie, Alberta  
jremuseveritt@rvschools.ab.ca

Dear Mr. Everitt,,

I am eager to pursue the Mechatronics academy for 20 level because I have a great passion for engineering and the academy would be a perfect fit for me. Mechatronics 20 will provide me with a more dense understanding of Electrical, Mechanical and Computer engineering.

I would like to take this opportunity to tell you a bit more about how my abilities and my experience make me an ideal candidate for this academy. I have had experiences with robotics in grade 8 and 9, business administration and have had hands-on experience with javascript, Arduino, Lego Mindstorm, Fusion 360, and Unity. I have also learned some basics of plastic welding as an addition to my curriculum in Mechatronics 10. As for the leadership role, I will always try to keep my group together and try to figure out solutions if we come across any unexpected problems with our design or project. I have developed strong time-management skills, as well as effective project management strategies. I am a quick learner and able to readily adapt my skills to a wide range of situations.

I have enclosed my resume for your review, and I would be pleased to discuss my suitability for the Academy of Mechatronics further in person. I can be reached at ahmedabdullah@rvschools.ab.ca. Thank you for your time and consideration.

Sincerely,

**AHMED ABDULLAH**
